

Doctor Adriano Salaroli

Hematologist, Jules Bordet Institute, Brussels
Steering Committee member, Young Blood

“What are the main challenges for young hematologists in Belgium?”

“As young hematologists, we want to create a network of young colleagues, opening the door for easy and quick consulting with the right specialist for each subspecialty. We also want to create all together a place where reliable information can be easily shared between us” ●

Prof. Dr Nathan De Beule

Hematologist UZ, Brussel
Steering Committee member, Young Blood

“Why is it important to come to the second meeting?”

“First of all, because the first meeting was a very nice experience to us all and as they say in French : “L’union fait la force” and so the more people we can reach, the stronger the network will become” ●
