

## Haematologist – Middlesbrough – United Kingdom

Submitted on: 08/06/2019, Reference number: 2019119

End date: 08/09/2019

### Location:

Middlesbrough is an industrial town in North East England situated along the North Sea coast on the River Tees in the county of North Yorkshire. Around 142,000 people live in Middlesbrough. Middlesbrough is close to the North Yorkshire Moors and the Yorkshire Dales National Parks and the Yorkshire coast. The city has highly rated schools and is easily accessible with a motorway network (A1M) and by train. The Lake district is less than 2 hours away and Leeds Bradford and Newcastle international airports are within an hour's drive.

The corporation of academic hospitals, by far the the largest in the region, consists of multiple centres, including a university hospital. Basic and specialist tertiary services are provided to a population of approximately 1.5 million. The university hospital performs the role of Major Trauma Centre for the entire population. In addition, it also houses the Regional Spinal Injuries Unit that provides service for the north of England and a population of 3.4 million. The Haematology department offers clinical care to a population of 480.000 people and tertiary care to more than one million people. The entire haematology spectrum is treated here. The department has access to modern equipment and a laboratory. Due to the academic nature of the hospital, the department is involved in both education and research.

### Job Description:

On behalf of this hospital in the United Kingdom we are looking for a haematologist for a full-time, position for a minimum of one year. The position is also available for newly qualified haematologists, registrars who are within 6 months of graduation can also respond.

The successful candidate will strengthen a team consisting of 12 other specialists, 3 registrars and specialized nurses. In addition, you will work in an academic hospital, but some shifts can take place in another, nearby hospital. Part of the tasks will consist of teaching medical students, interns and registrars. Involvement with the research performed in the department is encouraged.

For this position you must have broad haematological experience and skills. Candidates with a sub-specialty are preferred. If you do not have a sub-specialty, the employer offers the opportunity to develop one. Furthermore, you must have excellent social, educational, administrative and organizational skills to properly fulfil the position. The employer offers attractive employment conditions.
