Times that Belgium Inspectors participated in Inspections

Belgian JACIE inspectors

- * With the national regulation that Belgian SCT centers need to have a JACIE accreditation for RIZIV/INAMI reimbursement at the end of 2017, we are entering a more stringent accreditation cycle (of 4 years) and accordingly a more strict inspection schedule. This will increase the pressure on our inspector pool.
 - * Some of our trained and experienced inspectors are currently non-active (retired or too busy).
 - * The availability of international (French- or Dutch-speaking) inspectors becomes more often a limitation for the inspection planning within an acceptable time frame.
- > RECRUITMENT and TRAINING OF ADDITIONAL MOTIVATED INSPECTORS
